Comprehensive Wayfinding System for Central Contra Costa BART Stations

PROJECT # 10001 – 03

Successful transit-oriented development depends on creating an environment that is engaging to bicyclists, pedestrians and other transit users including the many who access the station by car. Public improvements are required to create a safe and inviting place for people to live, work, and use local services including public transit. This project will support future station and access improvements at the BART stations in Walnut Creek, Pleasant Hill, Concord and North Concord.

Did You Know?

BART celebrated its 40th anniversary of service in 2012.

Project **Comprehensive Wayfinding System – Central County BART Stations (# 10001-03)**
Sponsor BART
Subregion Central County

March 16, 2016

Scope

Create and implement a cohesive, integrated wayfinding system for Central County BART stations. Improvements can be phased by station.

Status

- Construction was completed in 2013 at the Pleasant Hill Station as part of the Pleasant Hill Station Modernization project, which received $600,000 in Measure J funds. The remaining $2,000,000 Measure J funds will fund the wayfinding signage contract at other central county BART stations.
- Final shop drawings for Concord and North Concord stations were approved by BART.
- At its May 8, 2014 board meeting, BART awarded a contract to LC General Engineering and Construction, Inc. for design, construction and installation of wayfinding signage at 16 BART stations including Walnut Creek, Concord, and North Concord. BART issued the Notice to Proceed (NTP) in early January 2015. The project is scheduled for completion in September 2016.

Issues/Areas of Concern

- None.
